PEELS – \$135

SKINCEUTICALS MICROPEEL GLYCOLIC

Customized for your desires, this Micropeel consists of up to three steps to awaken the skin. The first step may include dermaplaning: a process to remove the dead skin layers. It is a manual exfoliation process that gently scrapes the top layers removing unwanted skin and hair. The second step is the chemical peel consisting of glycolic acid to brighten and even skin tone and texture. The third step may include cryogenic therapy which is a gentle freezing process to cool and calm your skin. Feel your new skin emerging!

SKINCEUTICALS MICROPEEL PLUS

This Micropeel is designed to unclog pores and reduce acne. This peel combines salicylic and glycolic acids. Refined texture and evened tone are perks of this active peel.

SKINCEUTICALS SENSITIVE PEEL

Our most gentle Micropeel that uses lactic acid. This peel exfoliates and decongests pores while hydrating your skin. It may include dermaplaning and cryogenic therapy.

PIGMENT BALANCING MASQUE

This peel dramatically improves the appearance of hyper pigmented areas (sun & age spots, melasma). It combines a blend of glycolic and lactic acids as well as other brightening agents to even skin tone. It may include dermaplaning and cryogenic therapy.

SKINMEDICA VITALIZE PEEL

This is SkinMedica's most popular peel. The Vitalize peel uses a unique blend of beta and alpha hydroxy acids. This peel is great for reversing sun damage and the visible effects of aging.

SKINMEDICA REJUVENIZE PEEL

The Rejuvenize peel is SkinMedica's most intense medical grade peel. This peel is salicylic based and treats moderate to severe sun damage, melasma, acne, fine lines and wrinkles.
